

Esperance Ports Sea & Land Environmental Policy

The Esperance Ports Sea & Land is committed to managing its operations in an environmentally responsible manner at all times

To that end, the Esperance Ports Sea & Land will:

- Ensure that the environmental and social values of Esperance are protected.
- Ensure that community expectations are considered in the management of Port Operations.
- Ensure that responsibilities for environmental management are determined, communicated and clearly understood by all employees and contractors.
- Ensure that those responsibilities are met in the workplace practice.
- Ensure that environmental protection measures are integrated into overall activities at the Port, subject to practicability and environmental justification.
- Commit to continual improvement and prevention of pollution.
- Commit to compliance with applicable environmental legislation and associated regulations and any other relevant requirements including compliance with the Esperance Ports Sea & Land Environmental Management Plan.
- Communicate this policy to all employees through the port intranet and by posting this policy in readily accessible locations.

Dennis Parsons
